JUSTIFICATION AND APPROVAL:

OTHER THAN FULL AND OPEN COMPETITION JUSTIFICATION AND APPROVAL

1. Contracting Activity: Army Contracting Agency Information Technology, E-Commerce & Commercial Contracting Center (ITEC4), Alexandria, Virginia 22331-1700.
2. Description of Action: Approval is requested to award a contractual action, with option quantities, to obtain Xceedium Gatekeeper model XG-50i (remote access control appliance) to support the Medical Communication for Combat Casualty for Deployed Forces mission supporting OIF/OEF. The type of contract action will be Firm Fixed Price (FFP) using OPA funds. The requirement is for a quantity of 200 with four option quantities of 200 each, for a total of 1,000 units.
3. Description of Supplies/Services: The Medical Communications for Combat Casualty Care (MC4) is the Armys single Information Management/Information Technology System for automation and digitization efforts for deployable medical forces. MC4s mission is to develop and deploy an integrated family of medical communication and automated information systems to enhance command, control, and communications giving commanders at all echelons visibility of their medical situation as well as the status of their troops. MC4 automates and links the ten Army Medical Department (AMEDD) functional areas, enhances digital communications, and promotes battlefield medical situational understanding through emerging commercial-off-the-shelf/government-off-the-shelf COTS/GOTS technologies. MC4 links healthcare providers, medical diagnostic systems, command and control (C2), and information systems at all tactical echelons. The MC4 systems provide visibility of deployed medical forces and casualties, as well as, an accurate and timely means for documenting healthcare from the point of care to a centralized database in the theater of operations. The Xceedium Gatekeeper is the single device that meets all of the agencies requirements. The Xceedium Gatekeeper is a Secure Access Gateway for provisioning granular access to resources within each of the MC4 Level 2 and 3 hospitals. It is an appliance that enhances the overall perimeter security of each site while allowing the appropriate levels of access to doctors, internal IT support and 3rd party vendors for accessing and maintaining the infrastructure. The requirement is for a base quantity of 200 units with an estimated value of \$6,637,000 and four option quantities of 200 units each, each having a value of \$6,637,000, for a total estimated value of \$33,185,000. The option quantities will be evaluated at the time of award and may be exercised any time during a period ending three years after award.
